LASER SKIN REJUVENATION

Skin rejuvenation is a powerful, virtually pain-free Intense Pulsed Light treatment that reverses the noticeable brown spots and spider veins on your face, hands, chest or any area. Over time, the elastin fibers, give your skin that firm, youthful quality, simply break down. The result is a dull complexion and sagging skin that looks tired and worn. Skin Rejuvenation provides the kind of rejuvenation that'll give you a clearer, brighter, and more radiant complexion with diminished fine lines, reduced pore size, and a smoother overall skin tone.

SLIMMING - LIPOSONIX HIFU BODY SCULPTING

HIFU body sculpting is a non-invasive treatment for removing stubborn body fat, skin toning and tightening. HIFU Body treatments are the latest in non-invasive technology to target specific areas of fat in the quickest way possible. Only one treatment is required to achieve results and there is no downtime. Liposonix offers a real natural alternative to lip-suction or surgery.

8 Shots	30 min	R 1550
16 Shots	60 min	R 3000

SLIMMING - SYNERGIE

This FDA-approved machine uses vacuum massage technology, which gently combines suction and pressure to increase the metabolism and release the fluids from fat cells that cause cellulite.

8 Treatments		R 2000
12 Treatments		R 2400

ULTRASOUND CAVITATION

The most effective treatment for cellulite. It is a treatment based on ultra-sonic waves. Low frequency ultrasounds break down fat cells and convert them into liquid which can then be metabolized through the body's natural removal process.

LASER HAIR REMOVAL

Hair grows in stages and it's only during its growth cycle, when the hair is still in its follicle, that the removal process is most effective. The Hair Removal applicator combines a high level of light energy with maximum heat distribution to multiple hair follicles at a time. The energy penetrates into the deeper layers of the skin, targeting the pigment in the follicle beneath the skin's surface, but without damaging any of the surrounding tissue. Destroying the underlying follicle gets rid of the existing hair but also inhibits future hair growth in that area. Unlike other treatments, our technology ensures a consistent output of heat to best address your specific problem area. At the same time, an advanced cooling feature ensures your skin is protected from the heat, adding ultimate comfort. The technology also covers more surface area in less time than ever thought possible—faster procedures, peak power and maximum results!
